NEWS RELEASE

DPMS' Newest Target Rifle- The Panther LR-6.5
A Long-Range Competition Shooter's Dream Rifle Chambered in 6.5 Creedmoor!

Long-range competition shooters needed a rifle that gave them the accuracy and reliability of other DPMS rifles but chambered in 6.5 Creedmoor and DPMS has done just that with the Panther LR-6.5. This new rifle features a 24" stainless steel bull barrel, a 1x7.5 twist and the reliability and accuracy DPMS rifles are known for and what long-range competitors expect. The extruded 6066-T6 aluminum A3-style flattop upper receiver, complete with a dust cover, a forward assist/shell deflector that has been machined as one unit, and a Picatinny rail for easy scope mounting all feature the hard coat anodizing and Teflon coating customary to all DPMS rifles. A ribbed, aluminum free float tube, steel bolt carrier and a Koelbl single rail gas block for additional iron sights complete the LR-6.5's upper assembly. The lower assembly, built on the tack-driving LR-308 platform, features the hard coat anodized and Teflon coated black, milled 6061-T6 aluminum lower receiver with a semi-auto trigger, an integral trigger guard and an aluminum magazine release button. A standard Mil Spec A2 buttstock with a trap door assembly completes this new DPMS rifle. Additional specs include the rifle's weight when empty at 11.3 lbs and measures 43.6" OAL.

Available now, the Panther LR-6.5 (RFLR-65) will retail for \$1,199.00. (Optics are not included with the rifle.)

DPMS Firearms, LLC is an industry leader in providing quality AR-style rifles, components and accessories. No other company offers more styles or configurations of AR rifles.
