**NEWS RELEASE**

# Panther LR-TAC20

## The Classic 20" Rifle Gets Bigger and Badder

DPMS Panther Arms, continuing their commitment to customer service, has responded to numerous customer requests for a heavy hitting version of the classic 5.56 rifle by introducing the new LR-TAC20, a 20" tack-driving rifle chambered in .308 Winchester. This new LR-TAC20 features many of the same qualities which have made all of the Panther LR-308 rifles successful, including the milled 6061-T6 aluminum lower receiver, outstanding accuracy, reliability and an affordable price tag.

What defines this bigger and badder version of a classic 20" rifle is the thick-walled, extruded A3-style upper receiver (featuring a detachable carrying handle designed specifically for .308 rifles), the slim-line 4-rail free float tube and the kick provided by the .308-chambered heavy barrel with a beefed-up Panther Flash Hider. These features differentiate the new LR-TAC20 from all other LR-308 rifles, as well as the classic 20" 5.56 model. Additional features include a standard A2 front sight assembly, an A2 Black Zytel Mil Spec buttstock with trap door assembly and hard coat anodizing. DPMS' black Teflon® coating completes the package. Customers will applaud the new beefed-up .308 version of a classic rifle and appreciate the upgraded upper receiver, 4-railed free float tube, reliability, accuracy and affordability of DPMS LR-308 rifles.

DPMS is an industry leader in providing quality AR-style rifles, components and accessories. No other company offers more styles or configurations of AR rifles. DPMS also provides choices for high-power and small-bore shooters by offering several rifles chambered in .204, the new .22LR, .223/5.56mm, 6.8mm SPC, 7.62x39, .243 Winchester, .260 Remington, 308 Winchester and .300 Remington SAUM.
